# REGIONAL VARIETY TRIAL PROGRAM (RVT)

The RVT program is responsible for generating unbiased post-registration information for varieties of wheat, barley, oat, rye, triticale, flax, field pea, chickpea, lentil, dry bean and faba bean

The Alberta Regional Variety Trial program (RVT) is the most trusted source of various information for producers in Alberta. Farmers need accurate, regional and the most current variety information to stay competitive.

The goal of the RVT trials are to provide cereal, flax and pulse crop growers, and industry and extensions specialists with scientifically valid crop variety performance information under different agro-climatic conditions. Data is published in the Alberta Seed Guide and in Alberta Agriculture Varieties of Cereal and Oilseed crops for Alberta pamphlet

This site includes yellow & green peas, lentils, flax, wheat, durum, triticale & faba beans

## Thank you to our Contributors & Sponsors

Alberta Barley

For any questions please contact the CARA office at 403-664-3777
